Subject: Dell's DTS updates reminder

Date: Thursday, February 13, 2020 at 3:57:21 PM Eastern Standard Time

From: ejnewman@mitre.org

To: Newman, Eric

Hi Dell,

This is just a friendly reminder that the current DTS Compliance Report shows that you have one or more devices that are overdue for upgrades or that need patches.

Here's where the T881 group stands at the moment:

T881 Agile Sys Design & Engineering Summary Report	
Compliant Machines	63
Non-Compliant Machines	17
Machines Not Reporting	16
Total Machines	96

Please install the recommended patches and run the "Inventory Now" function inside of the Mitre Self-Service app to update your compliance status.

The following devices need attention:

Device	ID	Problem Reported
Microsoft Windows 10 Enterprise VMware Virtual Platform	W10INST-XD054	Missing some critical patches or system updates.

You can get more information about these issues, and links for updates at FJ: DTS

Thank you!

Please perform any needed updates and overdue patches to bring your equipment back into security compliance.

We don't want to show up as non-compliant on these Monday reports that go to senior leaders for advanced attention.
